

The Value of Choosing Our Values

Since 1968, Deltec Homes has provided high performance structures that are built with highest quality lumber on the market, provides energy efficiency, durability and a healthier, more comfortable environment. Our commitment to excellence drives us to build each structure to outperform all others in terms of quality, sustainability and strength. We strive to not only be the best *in* the world, but the best *for* the world.

Environmentally Sustainable Process

Our homes are prefabricated in a solar-powered plant that diverts an average of 80% of our construction waste away from the landfill and into local recycling and reuse applications. Our high quality truss lumber and plywood is certified through the Sustainable Forestry Institute for sustainable forestry.

Benefit Corporation

In 2015 we became the first prefabricated builder to achieve B Corp Certification, a certification given to companies who meet the highest standards of verified social and environmental performance.

A Leader in Green Building Practices

We've built homes and commercial structures to an array of green building programs including LEED, Energy Star, the National Green Building Standard, and Green Built NC. Our homes deliver an average blower door test result of 1.0 ACH50 and an average HERS score of a 47. In addition, our in-house HERS Rater can provide building science consulting for every project.

Living Wage Employer

With 50 years of business in Asheville and an average employee tenure of 10 years, we're proud to offer our a wage that not only benefits our employees' livelihood, but enhances our local economy.

Made in America

Our raw lumber and 99.9% of purchased building materials are made in the United States of America.
